SUMMARY

Backend & Infrastructure Developer with experience building developer tools, repository analysis systems, and full-stack applications using Node.js, TypeScript, and multi-database architectures. Skilled in API development, containerization, observability, and scalable backend systems. Interested in platform engineering, cloud-native technologies, and distributed systems.

EDUCATION

Ismail Yusuf College of Arts, Science & Commerce, Mumbai

Bachelor of Engineering in Computer Engineering, CGPA: 8.53/10

Expected Graduation: 2026

EXPERIENCE

Freelance Web Developer | Self-Employed

June 2024 – Present

Mumbai, India

- Delivered production-ready websites for local businesses using React and modern web technologies.
- Collaborated with clients to gather requirements and translate business needs into technical solutions.
- Deployed applications using Vercel and managed build, configuration, and deployment workflows.
- Provided maintenance, debugging, and post-launch support for deployed applications.

PROJECTS

CodeAtlas | Node.js, TypeScript, MySQL, MongoDB, Neo4j, Docker

- Built an AST-powered repository analysis platform to automate codebase exploration and dependency discovery.
- Designed a multi-database architecture using MySQL, MongoDB, and Neo4j for metadata storage and graph relationships.
- Implemented dependency mapping and repository indexing to visualize file, module, and class relationships.
- Containerized services with Docker and integrated Grafana and Loki for centralized logging and observability.
- Improved repository navigation by providing architecture-level insights into complex codebases.

Cognidesk | MERN Stack, TypeScript

- Developed an AI-powered knowledge management platform for organizing and retrieving documentation efficiently.
- Built REST APIs and React-based interfaces for content management and search workflows.
- Implemented automated tagging and categorization features to improve information discovery.
- Designed scalable MongoDB data models for structured knowledge storage.
- Streamlined documentation workflows through automated content organization features.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React, HTML, CSS

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB, Neo4j

DevOps & Tools: Docker, Git, GitHub, Kafka, Grafana, Loki
